

Time to outsmart climate change.

We can do this with a carbon fee and dividend.

We support carbon fee and dividend legislation in the U.S. Congress because we need a big climate change solution that will reduce carbon pollution quickly and on a large scale. It is:

1 Effective

Will reduce America's carbon emissions at the scale we need to control climate change.

2 Good for People

Will save lives, improve health, and put money into people's pockets every month.

3 Good for the Economy

Will create 2.1 million additional jobs across the U.S.

4 Bipartisan

Republicans and Democrats have co-sponsored legislation together.

It's your climate, too. Let's get started.

Here are three easy ways to make a difference today.

Our solution to climate change? Democracy.

We need you on our team.

Citizens' Climate Lobby

Citizens' Climate Lobby

Teamwork works.

Our shared responsibility is to build consensus in Congress.

Citizens' Climate Lobby supporters:

- Actively work with Republican and Democratic members of Congress.
- Helped start the House Climate Solutions Caucus, which works towards solutions in a bipartisan fashion.
- Unite supporters from across the U.S. who work locally towards a common goal.
- Show respect to everyone, and listen in order to understand other viewpoints.

It's so important that people on both sides of the aisle hear CCL's message: they want Congress to address the future we're going to leave our children.

Rep. Francis Rooney
(R, FL-19)

Thanks to CCL's tireless efforts to make climate change a bipartisan priority, we're changing the conversation in Congress on climate change.

Rep. Ted Deutch
(D, FL-22)

CCL has given me, a regular everyday guy, a voice to go out there to **try and change things** - to try to reach those people that have the power and to create political will.
